Dead Live Anew
Every year since the advent of home video, fan versions of films have edged to the fore. A while back a re-**edit** of "Star Wars: Episode 1" was all the rage on the net. Now Dean Lachiusa has re-edited "The Night of the Living Dead" which is in the public domain. His "version" has been dubbed "Night of the Living Dead: Survivors Cut." Lachiusa added a new beginning and several new elements including flashbacks to show more about Barbara and Johnny, plus radio broadcasts to flesh out the story a bit more. The **[trailer]** is posted in Real format and/or can be downloaded: www.archive.org/details/NightoftheLivingDeadSURVIVORSCUT . More about the project is available here (<http://www.nldfilm.com/>).
